W.S. DENNISON

“I recently engaged W.S. Dennison to help with a house move and to store furniture and other effects for me. I was impressed by their efficiency and good humoured diligence. I would happily recommend W.S. Dennison.”

Mr Clarke, Antrim

We work with the highest levels of consideration, care and precision when handling your irreplaceable possessions

Furniture dismantling service

13.6m trailers available for full load, cross-channel relocations

Packing and unpacking service available

Bespoke strapping and carrying aides are used to protect your furniture

Commercial/office removals and relocations also catered for

Two-man, white-glove domestic and commercial removals and storage.

“W.S. Dennison is our trusted partner for commercial removals. They deliver what is asked of them within the timeframe they have promised, and they are proactive in getting the job done.”

David Herron,
Sensata Technologies Limited

At its core, W.S. Dennison is a logistics company specialising in the transport and storage of furniture for manufacturers, importers, wholesalers and international and multi-national retailers. Traditionally, we focused solely on transporting goods from retailers and manufacturers to stores, but later diversified into home delivery. Having established an excellent reputation with our customers in the logistics sector, we realised that our expertise could be applied to domestic and commercial removals.

Founded in 1979, W.S. Dennison remains family-owned and operated, but with the support of a team of 30+ dedicated and highly trained personnel. We pride ourselves on providing a unique and personalised service.

TWO-MAN, WHITE-GLOVE SERVICE

To avoid product damage or contamination, our warehouses and vehicles store and carry only furniture and appliances, and we provide two-man delivery on every job.

Our removals team will always be uniformed in fully branded, protective clothing, plus we supply, install and remove work surface and floor coverings prior to starting any removal to safeguard both the goods being moved and the floors and walls at the removal or delivery location.

We have also had bespoke strapping and carrying aides manufactured, specifically to suit our operation. From bespoke furniture blankets and special ratchets for protecting goods when in transit, to a two-man furniture carrying device to assist in moving bulky items.

IRREPLACEABLE POSSESSIONS

We understand that items in your home, may not only have a financial value but also an emotional one. Our team of highly trained and experienced personnel underpin everything that we do. They work with the highest levels of consideration, care and precision, and offer full accountability and consistency of service at every stage of the process, giving you peace of mind.

PACKING & UNPACKING SERVICE

As an option, we can securely wrap and pack belongings and can dismantle furniture. You can opt for a complete packing service or simply seek our assistance for select fragile or

sentimental items. If you prefer to pack yourself, we can supply cartons and quality packing materials if required.

After transportation, we deliver to the room of choice or can unpack and position items in the appropriate rooms if this is your preference. We can reassemble furniture and install electrical goods. Our delivery agents are highly trained in specialist requirements, for example, some are fully trained joiners and electricians.

As a licensed waste carrier, we also provide customers with a service to dispose of unwanted items or packaging, via a combination of recycling and charity donation. All white goods are disposed of in line with EU regulation, Waste Electrical and Electronic Equipment (WEEE).

BESPOKE EQUIPMENT

Our fleet of vehicles can cater for any size of removal, up to full load, cross-channel operations. Each vehicle is specified to suit the specific requirements of furniture removal. We employ our own in-house mechanics to ensure that the fleet is maintained to the highest standards.

At W.S. Dennison, we believe that relocating, whether it be moving to a new house or office, should be an exciting time. Our aim is to minimise the inconvenience to you, allowing you to focus on the positive experience that it is meant to be.
